the Aging**

# 2022 National Lifespan Respite Conference

**March 3, 2023**

# **NYSOFA Caregiver Initiative**

A coordinated program to identify working caregivers in need and connect them to existing and funded services

# Purpose of Initiative

1. To make caregiving a statewide, all systems issue – public and private sector – data driven
2. To educate the workforce generally and leadership (public and private sectors) of the impact on their businesses due to employee's caregiving responsibilities and provide them tools/resources to help their employees
3. To help individuals self-identify as caregivers and link them to services and supports IF they need them
4. To help HR departments understand the impact of caregiving on employees and to provide resources to link to services/supports
5. To understand better the impact of caregiving on employees from their perspective, who, what, where, how often, tasks, etc.

# Why Now?

Caregivers are defined as family, friends and neighbors who provide a variety of tasks to help an individual with their daily living. ANY CARE COUNTS®.

- There are an estimated 4.1 million caregivers in New York State who provide 2.68 billion hours of unpaid care that if paid for at the market rate, would cost \$32 billion annually.
- In the U.S. today, one in six employees is a caregiver for a relative or friend and spends on average more than 20 hours a week providing some kind of care\*.
- The costs of caregiving to business and industry exceed \$50 billion annually

The percentage of adult children providing hands on tasks to a loved one to help them remain independent such as personal care, grocery shopping and meal preparation, transportation, assistance with medical and other appointments and/ or financial assistance to a parent has more than tripled during the past 15 years.

\*Gallup-Healthways. (2011). Gallup-Healthways Well-Being Index  
Any Care Counts® is a registered mark of Archangels, a key partner in this effort.

# Working Caregivers

- Survey – public and private workforce –seriously impacting state workforce – productivity, turnover, etc.

## CDC Data during Pandemic – 2020-2021

- 90%+ of HR departments want to do more to support working caregivers but are not sure what to do
